EDUCATION

New York Institute of Technology - Manhattan, NY [3.4/4.0 GPA]

August 2021 - May 2025

- Bachelor of Science in Computer Science by 2025, Honors: Presidential Honor List

TECHNICAL SKILLS

- Systems & Administration:** Windows 10/11, Linux, macOS, Active Directory, Microsoft 365, Google Workspace, VMware,
- Programming:** Java, Python, C++, JavaScript, React Native, HTML, CSS
- Networking:** TCP/IP, DNS, DHCP, VPN, VLANs, Cisco Packet Tracer, Wireshark
- Data Bases:** SQL, MySQL, Oracle, MongoDB
- Tools:** Git, GitHub, Excel, ServiceNow, Splunk, Batch Manager, Bash, PowerShell, SCCM, Remote Desktop, TeamViewer
- Data:** SQL Queries, Data Validation, Data Analysis, Data Cleaning, Requirements Analysis, System Testing

PROFESSIONAL EXPERIENCE

- Data Analyst at Kroll** December 2025 - Present
 - Analyzed high-volume datasets and records using Excel, Batch Manager, and CA.2 to identify discrepancies, duplicates, missing information, and data quality issues.
 - Performed data validation, cleaning, and reconciliation to maintain accurate and consistent records across internal systems.
 - Investigated recurring data issues, identified patterns and root causes, and communicated findings to team members to support timely resolution.
 - Used Excel to organize, review, compare, and validate data while maintaining accuracy under high-volume processing deadlines.
 - Documented data quality findings and supported process improvements that reduced repeated errors and improved workflow consistency.
- IT Support Specialist | data.goodspecialists** January 2024-May 2026
 - Provided technical support for Microsoft 365, Google Workspace, Windows applications, WordPress, and other business tools, troubleshooting user access, software, and configuration issues.
 - Assisted users with account access, application issues, permissions, and general technical troubleshooting, providing clear guidance and escalating more complex issues when necessary.
 - Supported day-to-day IT operations by troubleshooting technical issues, documenting solutions, and helping maintain reliable access to systems and shared resources.
 - Automated recurring support and administrative workflows using Python, Google Apps Script, and Zapier, reducing repetitive manual work and improving operational efficiency.
 - Maintained technical documentation and collaborated with staff through Microsoft 365, Google Workspace, Slack, and Trello to track issues and improve support processes.
- AI Security Evaluator at Outlier** January 2024 - January 2025
 - Evaluated AI model responses for potential exposure of customer, confidential, and organizational information.
 - Tested model behavior using adversarial prompts and privacy-focused scenarios to identify data leakage, unsafe disclosures, and security weaknesses.
 - Documented findings, scored model performance, and provided structured feedback to improve privacy protections, response safety, and overall model reliability.
- Help Desk Technician at Aspire High Youth** September 2023 - May 2025
 - Provided Tier 1 technical support to staff and users, troubleshooting Windows, Microsoft 365, hardware, software, account access, VPN, and network connectivity issues.
 - Logged, tracked, and documented incidents and service requests in ServiceNow, recording troubleshooting steps and resolutions and escalating unresolved issues when necessary.
 - Managed Active Directory user accounts, including password resets, permissions, group access, and account-related troubleshooting.
 - Supported Microsoft 365 applications including Outlook, Teams, SharePoint, and OneDrive, resolving common user access and application issues.
 - Provided remote technical assistance using Remote Desktop and TeamViewer and supported Windows workstation setup, configuration, and deployment.
 - Assisted with Windows device imaging and deployment through SCCM and documented recurring technical issues to improve future troubleshooting.

PROFESSIONAL PROJECTS

- Home Security Operations Center (SOC) Lab** May 2026 - Present
 - Built a security monitoring lab using Splunk, Windows 11, and Kali Linux within VirtualBox.
 - Collected and analyzed Windows event logs, created custom Splunk searches and alerts, and investigated simulated security events using SIEM-based detection and incident triage techniques.
 - Documented investigation findings and remediation steps to simulate SOC analyst workflows and improve incident response documentation.
- Threat Intelligence Aggregator | Python, REST APIs, SQLite** June 2026 - July 2026
 - Developed a Python application that collected, enriched, and normalized IP, domain, URL, and file-hash indicators using VirusTotal, AlienVault OTX, and AbuseIPDB APIs.
 - Implemented API authentication, logging, duplicate detection, rate-limit handling, and error recovery, then stored searchable IOC data in SQLite for faster investigations and future SIEM integration.
