

Nicholas Voronetskis

Brooklyn, NY 11214 | (347) 587-9960 | voronetskisnicholas@gmail.com | IT Support Portfolio

EDUCATION

New York Institute of Technology | Manhattan, NY | GPA 3.4/4.0

August 2021 - May 2025

Bachelor of Science in Computer Science, May 2025 | Presidential Honor List

TECHNICAL SKILLS

- **Systems & Administration:** Windows 10/11, Linux, macOS, Active Directory, Microsoft 365, Google Workspace, VMware
- **Programming:** Java, Python, C++, JavaScript, React Native, HTML, CSS
- **Networking:** TCP/IP, DNS, DHCP, VPN, VLANs, Cisco Packet Tracer, Wireshark
- **Databases:** SQL, MySQL, Oracle, MongoDB
- **Tools:** Git/GitHub, Excel, ServiceNow, Splunk, Batch Manager, Bash, PowerShell, SCCM, Remote Desktop, TeamViewer
- **Data & Automation:** Data validation, data cleaning, Google Apps Script, Zapier
- **Languages:** English, Russian (fluent)

PROFESSIONAL EXPERIENCE

- **Data Analyst at Kroll** **December 2025 - Present**
 - Collaborating on the development of a claims submission and review application to reduce manual processing, with planned API validation, SQL storage, Docker deployment, and Splunk monitoring.
 - Review claim records using Excel, Batch Manager, and CA.2 to identify duplicate IDs, missing information, and inconsistent file names.
 - Validate scanned documents for readability, completeness, and correct directory placement while handling confidential records under processing deadlines.
 - Compare records across internal systems, investigate discrepancies, and document recurring quality issues for team review.
- **IT Support Specialist | data.goodspecialists** **January 2024 - May 2026**
 - Troubleshoot Windows applications, Microsoft 365, Google Workspace, and WordPress, resolving software errors, configuration issues, and account access problems.
 - Resolved permissions and shared resource access issues, guiding staff through fixes and escalating complex problems.
 - Used Splunk to search application logs, investigate reported errors, and review alerts to support troubleshooting of software and system issues.
 - Automated recurring support and administrative tasks using Python, Google Apps Script, and Zapier to reduce repetitive manual work.
 - Documented troubleshooting procedures and coordinated technical issues through Slack and Trello to support consistent follow through.
- **AI Security Evaluator at Outlier** **January 2024 - January 2025**
 - Tested AI models with adversarial prompts and privacy scenarios to identify potential confidential information exposure and unsafe responses.
 - Scored model outputs, documented findings, and provided structured feedback on privacy protections, safety, and response reliability.
- **Help Desk Technician at Aspire High Youth** **September 2023 - May 2025**
 - Provided onsite and remote support for Windows, Microsoft 365, hardware, VPN, and connectivity issues using Remote Desktop and TeamViewer.
 - Tracked incidents in ServiceNow, documenting troubleshooting steps, resolutions, and information needed for escalation.
 - Supported Active Directory password resets, permissions, and group access; resolved Outlook, Teams, SharePoint, and OneDrive issues.
 - Assisted with workstation configuration, Windows imaging, and software deployment through SCCM.

PROFESSIONAL PROJECTS

- **Home Security Operations Center (SOC) Lab** **May 2026 - Present**
 - Built a security monitoring lab using Splunk, Windows 11, and Kali Linux within VirtualBox.
 - Created Splunk searches and alerts to investigate simulated Windows security events; documented findings and remediation steps.
- **Threat Intelligence Aggregator | Python, REST APIs, SQLite** **June 2026 - July 2026**
 - Integrated 3 APIs: VirusTotal, AlienVault OTX, and AbuseIPDB. Normalized IP, domain, URL, and file hash indicators into searchable SQLite records.
 - Implemented authentication, logging, duplicate detection, rate limit handling, and error recovery to support reliable data collection.
